

KEW-A2 APFSDS-T

120MM TUNGSTEN TACTICAL CARTRIDGE

The 120mm KEW-A2 cartridge has been developed by General Dynamics Ordnance and Tactical Systems to provide state-of-the-art tungsten Armor-Piercing, Fin-Stabilized, Discarding Sabot-Tracer (APFSDS-T) cartridges for 120mm smoothbore cannons. Based on the proven M829A2 round, the GD-OTS 120mm KEW-A2 provides a high-performance alternative to other heavy metal projectiles. Incorporating the very latest in 120mm discarding sabot technology, the GD-OTS 120mm KEW-A2 has demonstrated excellent dispersion and lethality, and is available for sale to international customers.

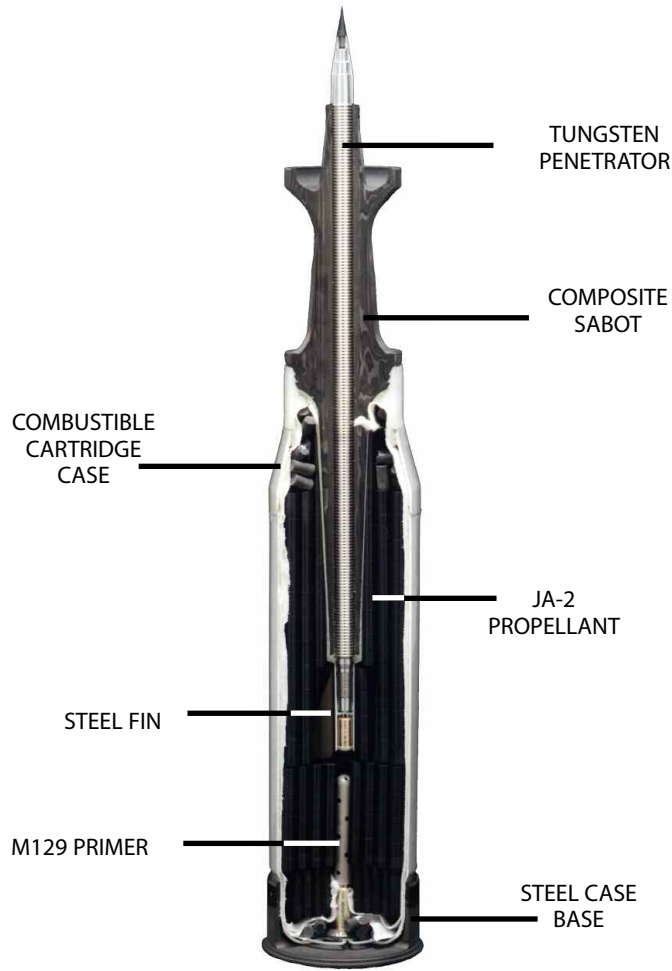

The KEW-A2 Cartridge was safety certified by the U.S. Government in September 2003, to be fully compatible with the M1A1 and M1A2 tanks.

GD-OTS is currently offering our KEW-A2 with a complete logistical support package.
